## Easy No-Sew Tie Fleece Blanket

### Materials Needed:

- 1 1/2 yards of fleece material
- fabric scissors
- ruler (optional)

### Steps to Blanket Construction:

1. Cut off the selvage edges on the fleece. The selvage is on the sides. Even out top and bottom of the fleece.
2. Using paper or lightweight cardboard, cut 5" x 5" squares. Use the squares to cut out 5" x 5" pieces of fleece in all four corners.
3. Make fringe strips by cutting approximately 1" strips 5" deep. The depth of the strips will equal the 5" used for the corner squares.
4. Tie two 5" strips together with a knot close to the body of the blanket (but please don't tie them corner to corner). **Or knot each strip individually;** this will make a flatter blanket. Work all around the blanket until finished.
5. If you want to make a double weight blanket, cut 2 pieces of fleece. When you knot the strips, do every other knot (2 strips) on one side, then turn over and do the remaining. Tying the knots this way will make it look like either side of the blanket can be the front.
6. You are done! You are finished and your blanket is ready to be donated.
